

WEEK 11 – THEORETICAL MODEL: DIFFUSION OF INNOVATION

Professors: Bruce Lubotsky Levin, DrPH, MPH & Ardis Hanson, PhD

In 1962 Everett Rogers created a model for the adoption of innovations among individuals and organizations. It has been widely used since that time and modified by other researchers to address policy transfer, also known as policy diffusion. Policy diffusion focuses on how institutional innovations are adopted by other institutions at the local, state, or national levels.
